GAIN NCEA

AND A CAREER

DIRECTION

THE ULTIMATE CAREER DECIDER

FREE 6 MONTH COURSE FOR 16 - 19 YEAR OLDS

*Credits towards NCEA Level 1

GAIN NCEA LEVEL 1

Without a qualification, getting a great career started is not easy. However, some people just don't enjoy school and prefer practical hands-on activities

This FREE 19-week course will give you the opportunity to achieve credits towards NCEA level 1 while taking you through a range of career tasters. Get hands on with Barista training and Quad bike skills, or be coached through your next level of drivers licence theory.

To help in gaining employment and equip you for life beyond school, you'll also cover personal financial planning, computer skills, writing CV's and communication skills... and that's just the beginning! In just 19-weeks, you'll be job ready, have some amazing and valuable life and work experience, a NZQA qualification and an opportunity to do further tertiary training.

Ultimate Student **JOHN**

John left school without NCEA at age 16. He enrolled in the FREE 'Ultimate Career Decider' programme, where he gained his NCEA Level 1, Learner Driver Licence, tractor driving and coffee making skills. After moving into the FREE BizTech course, John gained his NCEA Levels 2 and 3, along with advanced computer skills. Now, John has graduated from his one-year university level Web Design course. Not bad for a school dropout!

GET JOB READY

As part of the ultimate course you'll complete a number of career tasters to provide you with experience and skills to help prepare you for your future career.

SERVICE SKILLS

The explosive growth of our coffee culture means that Barista training puts you at the head of the queue for retail roles. All service stations, food outlets and cafes now require barista skills. The course includes barista training, cash handling, and food preparation.

PERSONAL SKILLS

We create exercises designed to get students into their chosen career. These cover computer skills, preparation of a CV and communication skills. We also cover practical financial planning such as how to evaluate the true cost of a loan, mortgage calculations and budgeting. Some of these elements carry NCEA credits.

DRIVING SKILLS

We can help you through (and pay for) the next stage of your driver's licence theory. If you have yet to gain your Learners, we will coach you through getting that. If you already have your Learner Licence, we will help you with the theory part of the Restricted Licence. Those with their Restricted can be taken through the Full Licence.

PREPARE FOR FURTHER STUDY

Gain the skills and confidence you need to go on to further study after completing The Ultimate course

TRADE SKILLS

If you like working outside, you will enjoy the farm based careers and the security industry tasters. Learn the safe way to operate quad bikes and tractors. You'll also have the opportunity to gain some valuable life skills in Security Forces Training.

EARLY CHILDHOOD SKILLS

The course provides a taster in Early Childhood Education in order for you to determine your skill set and to introduce you to the industry. This provides an appreciation for looking after young children and parenting skills. Great ideas are shared regarding the health and safety of children and how to keep them engaged.

#ULTIMATE PATHWAYS INTO:

The NZ Certificate in Primary Industry Skills L2

The National Certificate in Security L2

The National Certificate in Mechanical Engineering L2

The National Certificate in Early Childhood Education L3

The National Certificate in Business Administration and Technology L3

LEARN IN A SUPPORTIVE ENVIRONMENT

We offer a very supportive environment, which puts the student at ease. We have active student care programmes that offer classes that are free from bullying and help them overcome any anxiety.

We create individual learner journeys that show a clear pathway towards achieving graduation and then into their next chosen course or employment beyond the Ultimate programmes.

We are very strong on ethics, morals and personal time management.

Ultimate Student **BEN**

Benjamin had time off school due to ill health, which resulted in him not being able to achieve NCEA. Enrolling in the FREE 'Ultimate' course, he gained his NCEA Level 1, and is now studying computer animation at Animation College. Seeing the dramatic difference in confidence in Benjamin, his aunt sent Ben's cousin Kurt up from the South Island to enrol in the Ultimate course, from which he recently graduated.
